---

If you are getting the following error:

"The following error occurred while trying to join the session:

Failed to verify signature on program executable. "

What this means is that for some reason your executables do not have the proper digital signatures on them.

What might help is to delete the version\_system.txt from the iRacing installation then the web-site should ask you do redownload and install the system package again.

If you have any problems updating through the web interface, try navigating to your C:\Program Files (x86)\iRacingUpdate and double click the iRacingUpdater.exe

Once that runs and you click Done, go back and refresh your browser. [macera filmleri](#)

It should now say you are Up To Date.
