Series Points & Race Week Points

Race Points:

RACE EVENT points are scored in Official Series Races.

Races are valued by the Strength of Field (SOF), which is based on the iRatings of the drivers in the field.

The higher the average strength of field, the more points are available for each finishing position.

Race event points are adjusted for field size. The larger the field the smaller the difference in points awarded for each finishing position.

RACE WEEK POINTS:

Drivers may compete in as many Official Series Races as they choose in a given race week.

The best 25% of a driver's race performances (based on points scored) in a given Race Week will be averaged at the conclusion of each Official Series Race during the week. The final average at the conclusion of the Race Week will be the driver's Race Week Point Total and count towards the season championships in that series.

Example: If a driver competes in 4 official races, his/her best 1 would count; race 5 to 8 times and best 2 would count; raced 9 to 12 times and average of best 3 would count; etc

Number of Races	Number of Races Counted in Average
1	1
2	1
3	1
4	1
5	2
6	2
7	2
8	2
9	3
10	3
11	3
12	3
13	4

SEASON RACE POINTS:

Season points are calculated by totaling the race week points earned by a driver in a given series in a single season. A driver's best 8 weeks of the 12 Race weeks will count towards his/her season championship points.
