- The iRacing.com simulator features several hot-keys that can be used to make some tasks while driving easier to manage while driving.
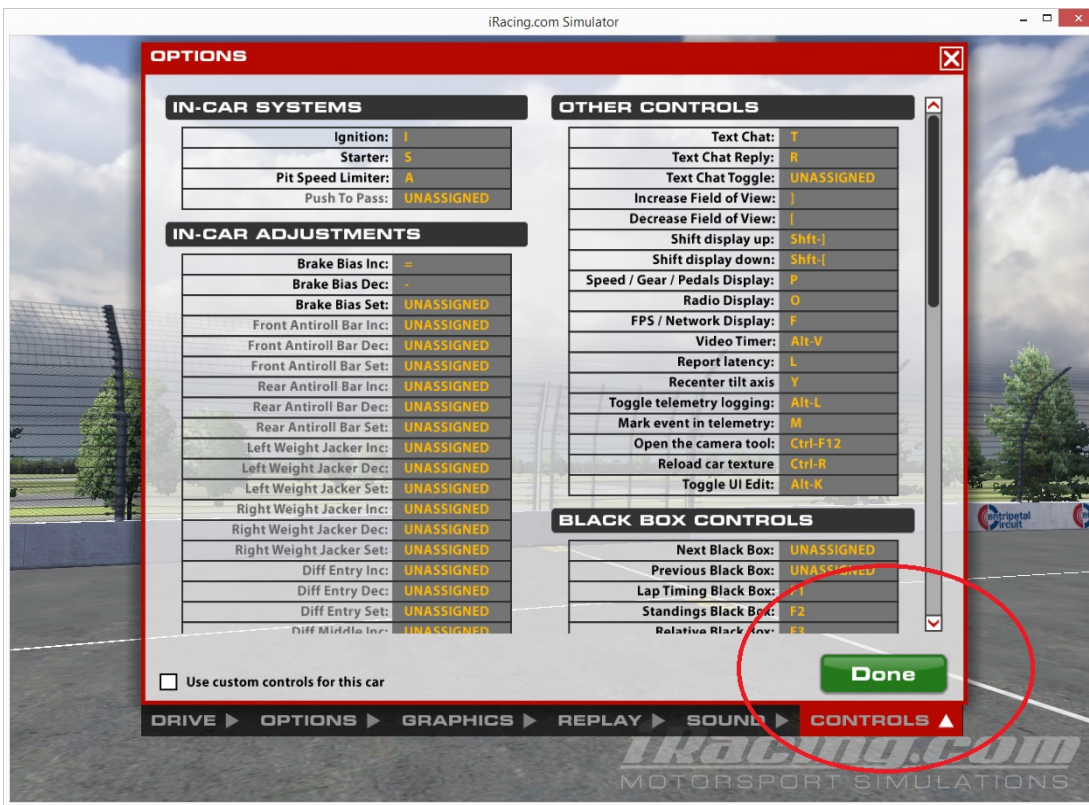

These hot-keys are setup by default the first time the sim is launched after install.

The hot-keys can be changed to each driver's preference in the options section of the sim.

To view or change the hot-hey assignments launch the sim then choose the **<OPTIONS>** tab at the top right of your screen.

Once in the options section, Click the **<CONTROLS>** tab at the bottom of the window to view the default hot-key assignments.

- Each user can customize the hot-keys. To change any assignment, place and click the mouse on the control you want to assign and place your mouse over the object you want to change and click

You'll receive a dialog box noting "unassigned"

- Once the key is assigned the dialog will disappear, click **<DONE>.**

- **Other Controls**

  –
